FIRECHIEF FIRE ESCAPE LADDER

WITH EXTRA WIDE TREAD

IMPORTANT INFORMATION

Model FEL430 – The length of the FEL430 ladder is 4.30m and is suitable for use in most 2 storey properties. When extended from the window, the bottom step of the ladder must be close enough to the ground to allow for a safe escape. Do not use this ladder from heights greater than 4.65m as injury could result.

Model FEL730 – The length of this ladder is 7.30m and is suitable for 3 storey properties, and 2 storey properties with a dormer window. When extended from the window, the bottom step of the ladder must be close enough to the ground to allow for a safe escape. Do not use this ladder from heights greater than 7.65m as injury could result.

These measurements are for your guidance only, and you must ensure that they suit your application.

The window to which the ladder is attached must be able to support the load of persons using the ladder for escape. The escape window must not be obstructed or covered with grilles or bars. The window must open fully for escape. Check for and avoid outside obstacles such as electricity or telephone wires and fences etc.

The minimum width of the escape window is 300mm. The maximum depth of window sill of the escape window is 340mm.

Storage of this ladder

Store the ladder near the exit window. A wardrobe or under the bed make ideal storage positions provided the ladder can be easily accessed. Do not store in direct sunlight or in temperatures above 50°C.

Planning for emergency escape

Prepare an escape plan and practice it. The plan should include a minimum of two means of escape from each room (door and window) and the nomination of a meeting place outside of your residence.

MAXIMUM LOAD 450KG AND A MAXIMUM OF 3 PEOPLE MAY USE THE LADDER AT THE SAME TIME. THIS LADDER IS NOT A TOY AND SHOULD NOT BE USED BY YOUNG CHILDREN UNLESS SUPERVISED BY AN ADULT.
